Claims

[c1] 7. An ink storage unit, comprising:

an ink tank, defining an inner confinement space limited by at least an inner sidewall, and further provided with an air inlet and an ink outlet, the air inlet enabling an external air to enter the confinement space and the ink outlet enabling an ink to be outputted out of the confinement space; and

an ink storage body, received within the confinement space, the ink storage body being comprised of: a first ink storage portion, placed approximately close to the air inlet;

- a second ink storage portion, placed approximately close to the ink outlet; and
- a spacing member, placed between the first and second ink storage portions to separate the first ink storage portion from the second ink storage portion.
- [02] 8. The ink storage unit of claim 7, wherein the air inlet is substantially spaced away from the ink outlet.
- [03] 9. The ink storage unit of claim 7, wherein the spacing member is comprised of a plurality of ribs that oppositely abut the first and second ink storage portions.

- [04] 10. The ink storage unit of claim 7, wherein the first ink storage portion has a capillary effect that is higher than that of the second ink storage portion.
- [05] 11. The ink storage unit of claim 7, wherein a pore density of the first ink storage portion is higher than that of the second ink storage portion.
- [06] 12. The ink storage unit of claim 7, wherein the first ink storage portion is made of a porous material.
- [07] 13. The ink storage unit of claim 12, wherein the porous material includes a sponge.
- [08] 14. The ink storage unit of claim 12, wherein the porous material includes a fabric.
- [09] 15. The ink storage unit of claim 7, wherein the second ink storage portion is made of a porous material.
- [c10] 16. The ink storage unit of claim 15, wherein the porous material includes a sponge.
- [011] 17. The ink storage unit of claim 15, wherein the porous material includes a fabric.
